## CAREER OBJECTIVE

---

A programming enthusiast highly interested in seeking theoretical and practical knowledge of Computer Science. Besides, I love to explore, learn new things and want to build myself up as a successful software & web developer.

## SKILLS

---

*Expertise:* **React, React-Router, ES6, JavaScript, Bootstrap, MongoDB, Material UI, HTML5, CSS3**

*Comfortable:* **Nodejs, Express.js, JSON, Firebase, SCSS, Java, C++**

*Familiar:* **Redux, Wordpress, MySQL, PHP, Pyqt, Tkinter, Windows Form App, Visual Basic**

*Tools:* **VS code, Git, Netlify, Heroku, Photoshop, Illustrator, Canva, Premier Pro**

## EXPERIENCE

---

### PROJECTS

#### ***Creative Agency:***

- Developed a working full-stack web application which serves the purpose of a digital service providing agency. Here a customer can select his/her desired service, order it & see their ordered services & status from dashboard. I also developed an interactive dashboard for the admin, where she can see all the orders, add new services, add new admin & see the list of all the orders.
- *Technology:* **ReactJS, React Router, NodeJS, Express.js, MongoDB, Firebase Authentication, Heroku, etc.**
- *Live site:* <https://creative-agency-client-da4c6.web.app/>
- *Repository link:* [Github](#)

#### ***Volunteer Network:***

- Developed a working full-stack web application which serves the purpose of a volunteering service providing community. Here a volunteer can select his/her desired service which s/he want to provide, book it with details. Developed a page for the admin, where s/he can see all the booked services and add new services.
- *Technology:* **ReactJS, React Router, NodeJS, Express.js, MongoDB, Firebase Authentication, Heroku, etc.**
- *Live site:* <https://volunteer-network-client-f388c.web.app/>
- *Repository link:* [Github](#)

### **Travel Guru:**

- Developed a working front-end web application which serves the purpose of a tour agency. Here a customer can select his/her desired tourist spot, book it on their desired date. & then redirected to a page containing all the hotels history and location of hotels in google map in that area.
- *Technology:* **VanillaJS, NodeJS, ExpressJS, MongoDB, PassportJS Authentication, Heroku, etc.**
- Live site: <https://travel-guruu-48a90.web.app/>
- Repository link: [Github](#)

### **EXTRA-CURRICULAR**

- *Interface and Web developer Team, [Onushondhani Lab](#), May,2020 – Present*
- *Competitive Programmer, Newbie, [Codeforces](#)*
- *Mechanical Team, [BRACU DUBURI](#), October,2019 – Present*
